Subject: Insects: Dragonflies my expertise 4 Checklist Widespread species (29)

Please indicate **survey method** to show whether you carried out a complete site survey. You can enter **survey conditions** for records that have a time. **Total Adults** should reflect all adults seen, even if the other columns show a breakdown. If numbers are not available, use + to show presence in any column.

**Studland Peninsula:** Join in with the **National Trust's Cyril Diver** recording project. David Brown has set up **public location markers** for all the main reserve comparison species. For more precise records, please add your own location markers.  
 To display the **compartment boundaries** during data entry, tick the checkbox

## Site-based recording...

- A local focus for recording.
- Detailed maps inform recorders.
- Ideal for small-scale recording projects.
- Enables a co-operative approach.
- Immediate access to all records for responsible team.
- Rewards and encourages recording by local naturalists, staff, rangers, ecologists etc.

## Site and Area-based recording is ideal for...

- Reserves
- Local councils - district, borough, parish plus sites
- Landscape-scale project areas
- National Parks
- Areas of Outstanding Natural Beauty
- Sites managed by land owners and utilities
- Farms
- Local projects
